

# 101 Terrorism: Detect, Prevent and Respond Workshop

## Synopsis

Terrorist attacks occur more frequently all over the world and each time the attacker uses our own weaknesses against us. Training your entire work force to better understand the situation will make your facility less attractive for the attacker to choose it as a potential target. In this program we teach people without any police or military background how to be more aware, how to look at things in a different way, how to recognize anomalies, what is suspicious behavior and of course, how to respond to it within the means available to them. Your entire work force is the first responders and these people do matter in case of a threat. Identifying and recognizing a dangerous situation at an early stage will save lives and mitigate the impact of an attack.

## Who should attend

Employers, HR, WSH Professionals, developers, main contractors, sub-contractors, professional engineers, resident technical officers, safety consultants, construction industry professionals or anyone who is interested in this topic
