Risk Assessment for a Safe Workplace
(Code of Practice on WSH Risk Management)

Synopsis

The Workplace Safety and Health (Risk Management) Regulations was introduced in 2006 to require employers, principals and self-employed persons to implement risk management in their workplaces. This includes conducting risk assessments in relation to the safety and health risks of all their work activities. Risk assessments are conducted to identify, evaluate, and control, if not eliminate, all hazards and foreseeable risks to workmen.

This program provides learners with the skills and knowledge required to implement effective risk assessment (RA) in their workplaces. Learners will learn to adopt a systematic methodology in developing appropriate control initiatives with reference to the Code of Practice on Workplace Safety and Health Risk Management. Upon completion of this course, learners will understand the legal requirements, be able to identify hazards, evaluate risks and implement appropriate risk control measures.

Objectives:

By the end of the course, participants will be able to:

- Implement risk control measures
- Identify hazards and evaluate risks
- Develop and maintain the necessary records
- Understand the legal requirements pertaining to RM

Who should attend

Risk Management Champions, RM / RA Team Leaders, HR Managers, Management Staff, Engineers, Executives, and Line Supervisors.

Trainers

Our trainers are qualified Safety Professionals with many years of experience in WSH and who are accredited by the Ministry of Manpower.
