

Develop a Workplace Safety and Health Management System (WSHMS) Implementation Plan (bizSAFE Level 4)

Synopsis

This course provides learners with the knowledge and skills to be a WSHMS Program Lead for the organisation in preparing a WSHMS implementation plan to meet the requirements of ISO 45001 and risk management code of practice and for recognition of bizSAFE level 4 by Workplace Safety and Health Council. It entails reviewing the current WSH policy, risk management plan, and WSH programmes. It also includes establishing frameworks for WSH management programmes and emergency preparedness and response plan in accordance with organisational safety and health needs and WSH legal and other requirements.

Objectives:

On completion of this course, learners will have the knowledge and application skills to:

- Review WSH policy and risk management plan for deficiencies against the requirements of ISO 45001 and risk management code of practice
- Apply hazard identification and risk assessment methodology to determine the controls necessary in reducing risks at source in accordance with requirements of ISO 45001 and risk management code of practice
- Set WSH objectives and determine specific programme(s) to enable the achievement of the WSH objectives for organisation in alignment with WSH policy
- Establish WSH management programme framework for organisation to embark on to meet the organisational safety and health needs and in accordance with WSH legal and other requirements
- Establish a framework for organisational emergency preparedness and response plan in accordance with WSH legal and other requirements
- Develop operational control to manage the WSH risks to an acceptable level in consistent with hierarchy of controls and comply with applicable WSH legal and other requirements
- Develop performance measurement and monitoring procedure to monitor and measure WSH performance in accordance with organisational safety and health needs and WSH legal and other requirements
- Develop processes for investigation and reporting of accident/incident based on WSH legal and other requirements
- Establish an internal audit programme to evaluate the organisational WSH management system for conformance to ISO 45001 requirements and WSH legal and other requirements
- Develop the WSH management system implementation plan based on the needed changes identified that fulfil ISO 45001 requirements and risk management code of practice
- Conduct management review of WSH management system to ensure its continuing stability, adequacy and effectiveness in accordance with ISO 45001 requirements and WSH legal and other requirements
- Present to stakeholders the developed WSH management system implementation plan for review in accordance with organisational procedures

Who should attend
