

# Creative Ways of Generating Ideas for WSH Professionals

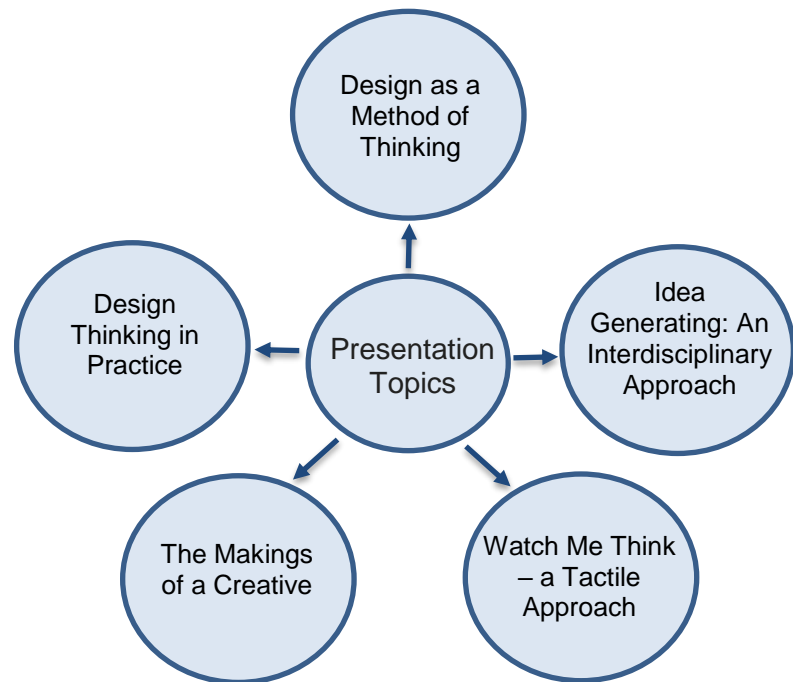

## Synopsis

Learn how to apply design as a method of thinking to generate ideas and solve problems at work or in your daily life. The method uses a line of questioning that enables you to perceive a given scenario or set of problems differently from how analytical thinking will otherwise present them to you. Using design thinking allows you to discover new possibilities and arrive at solutions that you may otherwise have not been able to.

## Objectives

At the end of this workshop, participants will be able to:

1. Identify problems and adopt problem solving skills
2. Expand creative thinking skills and generate ideas

## Who should attend

WSH Professionals, Managers, Advisors, HSE Engineers, Executives and anyone who is interested in understanding the topic

## Trainers

Our trainers are well-qualified professionals in their respective industries who also possess experience relevant to the content delivery.
